INTRODUCTION

As the most important thing for Rotto is its community, the transparency of the Rottoken team is key to the trust of all its holders.

Here you have our whitepaper, simple, clear and easy to read.

Now you have no excuse. DYOR 💎💎

\$ROTTTO is a community-driven token on Binance Smart Chain (BSC) with deflationary properties that pays out reflections rewards to holders (automatic yield generation).

\$ROTTTO employs four simple functions: Reflections + BuyBack + Manual Burns & Marketing.

On each operation, the transaction is taxed with a 10% fee,

which is divided into four parts: 3% is distributed to all token holders

(based on how much a holder owns) in stablecoin (Busd)

3% is bought and then burned automatically.

3% for Marketing and development.

The remaining 1% is added to the liquidity of the pool.
